

<b>Job Title</b>	Intermediate or Senior Mechanical Engineer
<b>Location</b>	Manchester
<b>Job Type</b>	Full Time Technical
<b>Reporting to</b>	Mechanical Team Leader

## The Opportunity

CWC are a proud independent practice that uses our accumulated experience and knowledge to provide our team with the opportunity to work on some of the most exciting and innovative projects throughout the UK.

We take the time to recognise our collective and individual achievements and reward our staff with a clear commitment and structure for career advancement.

We provide a contemporary working environment with agile working, generous holiday entitlement, relaxed dress code and an absence of bureaucracy.

We invest in our people, and you will have access to Continuous Professional Development and further education at all levels.

We encourage staff to share and contribute knowledge to local schools and universities and our industry on an open-source basis and we donate volunteering time to support projects that bring about positive change.

We are currently seeking an Intermediate or Mechanical Engineer to join our Manchester Team and contribute to the delivery of schemes across a range of market sectors.

Successful candidates will receive the following benefits and rewards:

- ▷ a competitive salary
- ▷ contributory pension scheme
- ▷ a contemporary working environment
- ▷ structured professional development and advancement
- ▷ professional institute membership fees
- ▷ agile working arrangements
- ▷ funded health care cashplan
- ▷ cycle to work scheme
- ▷ employee rewards scheme
- ▷ death in service benefit

- ▷ volunteering days

In addition, you will join a business that is owned and operated by an employee ownership trust for the benefit of all staff. Benefits include a specific income tax exemption of up to £3,600 per tax year on any bonuses paid to employees by the company which is controlled by the Trustees.

## Purpose of the Position

- ▷ To support with the production of high-quality mechanical services design packages across all stages of the design development process.
- ▷ To represent the company and support with the promotion of our core values at stakeholder engagement meetings and the local professional network.
- ▷ To support your line manager and peer group through collaboration and knowledge sharing.
- ▷ To identify opportunities for further personal development and advancement.

## Requirements of the Position

- ▷ Demonstrable experience within a similar or relevant working environment at a graduate, intermediate or senior grade.
- ▷ Competency with the market leading software required to produce and validate design outputs.
- ▷ Competency with the market leading software required to communicate and exchange technical information.
- ▷ Demonstrable academic qualifications appropriate to the role.
- ▷ A genuine interest and enthusiasm in the built environment.
- ▷ Demonstrable familiarity with key industry agendas and emerging technologies.
- ▷ Membership or affiliation with a relevant professional institution.
